Business challenges
Improving security functions and completing the mission on time and under budget while ensuring all assets are safe, secure, and optimized. The Department of Defense (DoD) and other federal agencies plan to train and certify their information assurance specialists. However, to safeguard their critical network infrastructure from threats and vulnerabilities, the challenge remains to maintain the network and operations as “up and running.” That is why Maden Technologies offers comprehensive, reliable, scalable and cost-effective solutions for training, securing, and protecting critical assets, personnel and information.

How we can help
Maden Technologies supports the missions of military, intelligence, and civilian agencies through our understanding of the challenges and fast delivery of early results based on lessons learned from past performance. Maden Technologies brings a full spectrum of information technology and security experience and world-class services to the HP team for successful Army transformation. As part of the HP ITES-2S team, Maden Technologies’ skilled professionals can support transforming the Army into a secured, network-centric, knowledge-based force. Our DoD customers include CIO/G6, TF-GNO, DTRA, and other Federal agencies.

What you can achieve
• Customizable and comprehensive security services solutions that preserve and safeguard personnel, facilities, property, and other operational assets
• Assistance in meeting the information technology security certification and accreditation requirements of the Federal government
• Secure, reliable mission-critical networks and operations, managed in a trusted environment
• Information technology risk management, threat risk, and enterprise protection from internal and external attacks
• Programs that are efficiently and effectively developed and managed by our Program Management Office
• Supplier performance insights for expenses to ensure lowest cost, best quality and timely delivery of materials
About Maden Technologies

Founded in 1986, Maden Technologies is an award-winning Service-Disabled Veteran-Owned Business that has been delivering superior customer support for more than 20 years. Our mission is to optimize enterprise solutions and services for the public and private sectors. We develop and deliver secure, comprehensive information technology solutions to our clients at the DoD, State and Local, and Civilian agencies. Maden Technologies’ multi-level secure facility, located in close proximity to the Pentagon, ensures the integrity of unclassified through SCI level systems, as well as physical, personnel and network infrastructure protection. In combination with our in-house Technology Integration Center, our leading-edge mission-critical client solutions are developed, tested, implemented and managed in a trusted environment.

An overview of Maden Technologies’ capabilities includes:

• Integrated security solutions
• Identity and access management
• Information assurance
• System analysis and integration
• Acquisition lifecycle management
• Program management and consulting
• Network services and solutions
• Multi-level secure facilities and networks management
• Learning services
